

Mr. Ted Husser, Clerk
Town of Jonesville
P. O. Box 428
Jonesville, Louisiana 71343

Dear Mr. Husser:

This is in reply to your letter of November 25, 1970, regarding the requirements for filing plans of inspection and maintenance as required by 49 CFR, Section 192.17

We have as yet developed no guidelines for these plans, leaving such requirements for the submission due before February 1, 1971, to the judgment of the operator. At a minimum the plans should cover all requirements of inspection and maintenance of 49 CFR, Part 192.

After we have had an opportunity to study plans submitted and to evaluate them, we will determine whether there is a need for the kind of guidelines you have requested. Meanwhile, we are aware of the difference to be expected in the plans from large operators with substantial administrative staffs and those with a lesser capability.

Thank you for your interest in pipeline safety.

Sincerely,

/signed/

Joseph C. Caldwell
Director, Acting
Office of Pipeline Safety
