Dear Sirs:

I am writing you in order to determine if there is a legal maximum hydrogen sulphide content of a natural gas stream to be transported both inter and intra state. Also, are gas distribution systems treated the same?

If you can refer me to proper legislation or guides, please write me at the address below.

I currently am aware of NACE MR-01-75 (1978) and DOT paragraph 192.475.

Thank you, in advance, for your cooperation.

Sincerely, yours,

J. B. Haug
