

INFORMAL INTERPRETATION
TELEPHONE - BUCK FURROW
12/14/79

Furrow indicated that relative to FUEL GAS LINES & DOMESTIC LINES at compressor stations, he feels the current regs (192) were not intended to govern these lines. However, the statute (NGPSA) does provide for them to be included, or regulated. In essence, he feels that the lines are not regulated by Part 192 because gas is not actually in transportation any longer. There is no consumer. Commerce has been eliminated.
